Our Commitment to Sustainability

Caring for the Planet
Begins at Home

Here in Hopewell…

- Every day, we recycle 15,000 gallons of process condensate to use as make-up water for the cooling tower.
- We have reduced the water consumption of our air emissions scrubber by over 3,100 gallons every day.
- Our pallet recycling program saves 8,000 trees a year.
- The returnable packaging program avoids 20 million pounds of solid waste going to the landfill.
- Polyester film has the lowest water usage of all polymer films.

Returnable Film and Packaging
Recycling Program

If we use it to package our films, we will recycle it. We will accept the following:

Pallets, end boards, tops, separator boards, core plugs, cores and more.

Metalized, laminated, printed, clear and coated roll scrap.

All clear films and many coated and printed baled scrap.

Chunk/purge polymer, coated and clear loose film scrap.

Environmentally Friendly
Mylar® Films

Our films are made with post-consumer recycled materials and conserve energy when used.

Lidding films reduce packaging by eliminating clamshell trays.

Convenience lidding for home use contains 30% post-consumer recycled PET.

Mylar® films reduce packaging by eliminating trays as well as save energy and water by reducing cooking and cleanup time.
